

Finals Task 3. DAX Time Intelligence Function

In this project task, I developed a comprehensive matrix table to track sales and pricing dynamics across multiple fiscal years, leveraging time-intelligence calculations to highlight year-over-year growth and operational volume trends over a month-by-month timeline.

In this image, I constructed a detailed matrix visual in Power BI to evaluate annual and monthly sales performance, displaying key price metrics, order volumes, and a calculated **Sales YoY Growth** measure hierarchically broken down by fiscal years.
